Professor Lorenzini was very helpful in this course. He was open to any questions and always willing to help.

I think professor Lorenzini was a great teacher. I have a lot of respect for him. I like the way he taught class, his grading, was fair, and he made math as interesting as it could be.

Dr. Lorenzini is a great teacher. He focuses the class on understanding the why, not just the how to do something. I really enjoyed being in his class.

Mr. Lorenzini was the best!!

Very enthusiastic about teaching and reaching students who may not be interested in math he wants to make them interested.

Enthusiastic, Fair Grading.

Good job.

Just an incredible teacher who seemed to really care that we understood.

The instructor made a seemingly difficult class not as difficult and was very kind and helpful to everyone.

Concave up.

This was the first math class I have taken where the instructor actually showed how math was useful or relevant in life.

I thought the teacher was very thorough in explaining things in class, and always helped with homework problems at office hours.

I learned a lot more than calculus in this class, which I enjoyed. Concave down (only because someone else did the concave up).
